## Profile

|           |                                                 |
|-----------|-------------------------------------------------|
| Full Name | Eric Dominic Heinz                              |
| Birthday  | 09 September 1990                               |
| Address   | Im Bienengarten 25,<br>55218 Ingelheim, Germany |
| Languages | German (Native), English (C1)                   |

## Skills

### Teamwork

I have worked in Teams of various sizes across multiple Orgs. Most of the time in close contact, as if I would share an office with them.

### Software Testing

Testing is critical for every non trivial software and therefore best implemented as early as possible. Robust testing enables a bugfree Application.

### Agile Methods

I am accustomed to work in an agile environment and had the opportunity to guide other teams in this regard.

I am of the opinion that this is one of the best methods for backend developing.

### New Technologies

New Technologies, like currently LLMs, should always be evaluated and integrated into the Product or Toolchain, if useful of cause.

## University

### Graduation

Bachelor of Science in Informatik  
at Gutenberg Universität Mainz

Nebenfach: BWL

### Bachelor Thesis

- Visualisierung von Volumendaten mithilfe der Oculus Rift

### Specialization

- Client-/Serverseitige Webanwendungen
- Operating Systems
- Mobile Computing
- Artificial Intelligence

### Seminars

- Angewandte Algorithmik
- Approaching Programming Contests

## Professional Experience

|       |               |                       |
|-------|---------------|-----------------------|
| C/C++ | Docker        | Go / Golang           |
| PHP   | Behat/Gherkin | Typescript/Javascript |
| C#    | Python        |                       |

|                     |                     |                  |                    |
|---------------------|---------------------|------------------|--------------------|
| <i>Knowledge of</i> | AI Systems / Theory | Linux / Unix     | MySQL              |
|                     | Java                | HTML 5.0 / CSS   | Lua                |
|                     | Bash                | Clean Code & TDD | Agile Environments |

|                   |       |        |         |

| <i>Experience</i> | <b>Backend Developer at Link11 GmbH</b><br>Free to work after September 01<br><br>Backend C and Python programming and maintenance of main cloudbased DDOS detection/defending application and internal support<br><br>Tasks: <ul style="list-style-type: none"> <li>● Fixing of customer found bugs</li> <li>● Maintenance/Developing of internal tools, e.g. Agile Sprint Analyse</li> <li>● Internal engineering and tooling workshops</li> <li>● Maintenance of Systems</li> </ul> Languages:<br>C/C++, PHP, Python, Javascript, Perl, Bash | 2023 - August 2026 |
|                   | <b>Junior (Backend) Developer at NFON AG</b><br>Backend api programming in PHP for a Cloud-based telephone system and supporting/developing internal Tools. Also Testing with Behat<br><br>Tasks: <ul style="list-style-type: none"> <li>● Fullstack Developer for internal Tools</li> <li>● Backend API Design of the telephone system</li> <li>● Reimplementaion of old Services in Golang</li> </ul> Languages:<br>PHP, Python, Javascript, Golang,C#                                                                                        | 2016 - 2023        |
|                   | <b>Fullstack Developer at eTermio GmbH</b><br>Fullstack (Frontend/Backend/DB) for a Online-Calender-App<br><br>Tasks: <ul style="list-style-type: none"> <li>● Fullstack (Frontend/Backend/DB) Development</li> <li>● API Design</li> <li>● Communication between customer and internal Databases and E-Mail composition</li> </ul> Languages:<br>PHP, Python, Javascript                                                                                                                                                                       | 2014 - 2015        |

---

## Working Student Developer at eTermio GmbH

2013 - 2014

Working Student (Frontend/Backend/DB) for a Online-Calender-App

Languages:

PHP, Python, Javascript

---

## Studied Informatik B.Sc. at Gutenberg Universität Mainz

2010 - 2015

Programming of an Onlinevoting-System at my University, also some other Courseworks

Languages:

PHP, Java, C/C++, Haskell

---

## Abitur

2010

General University Entrance Qualification

---
