+49 151 - 59895486

Profile

Full Name	Eric Dominic Heinz
Birthday	09 September 1990
Address	Im Bienengarten 25, 55218 Ingelheim, Germany
Languages	German (Native), English (C1)

Skills

Teamwork

I have worked in Teams of various sizes across multiple Orgs. Most of the time in close contact, as if I would share an office with them.

Software Testing

Testing is critical for every non trivial software and therefore best implemented as early as possible. Robust testing enables a bugfree Application.

Agile Methods

I am accustomed to work in an agile environment and had the opportunity to guide other teams in this regard.

I am of the opinion that this is one of the best methods for backend developing.

New Technologies

New Technologies, like currently LLMs, should always be evaluated and integrated into the Product or Toolchain, if useful of cause.

University

Graduation

Bachelor of Science in Informatik
at Gutenberg Universität Mainz

Nebenfach: BWL

Bachelor Thesis

- Visualisierung von Volumendaten mithilfe der Oculus Rift

Specialization

- Client-/Serverseitige Webanwendungen
- Operating Systems
- Mobile Computing
- Artificial Intelligence

Seminars

- Angewandte Algorithmik
- Approaching Programming Contests

Proficient in

C/C++	C#	Behat/Gherkin
PHP	Docker	Python

<i>Knowledge of</i>	AI Systems/Theory	HTML 5.0 / CSS / JS	Agile Environments
	Golang	Java	
	Bash	MySQL	
	Linux	Lua	

<i>Frameworks</i>	Yii2	Unity	Behat
	PyTest	QT	

<i>Interests</i>	Virtual Reality	Retrocomputing	Theoretical computer science
	Simulation	Carnivorous Plants	

<i>Experience</i>	Backend Developer at Link11 GmbH	2023 - Current working there
	3 Month notice period at beginning of month Backend C and Python programming and maintenance of main cloudbased DDOS detection/defending application and internal support	

Tasks:

- Fixing of customer found bugs
- Maintenance/Developing of internal tools, e.g. Agile Sprint Analyse
- Internal engineering and tooling workshops
- Maintenance of Systems

Junior (Backend) Developer at NFON AG	2016 - 2023
Backend api programming in PHP for a Cloud-based telephone system and supporting/developing internal Tools. Also Testing with Behat	

Tasks:

- Fullstack Developer for internal Tools
- Backend API Design of the telephone system
- Reimplementaion of old Services in Golang

Fullstack Developer at eTermio GmbH	2014 - 2015
Fullstack (Frontend/Backend/DB) for a Online-Calender-App	

Studied Informatik B.Sc. at Gutenberg Universität Mainz	2010 - 2015
Programming of an Onlinevoting-System at my University, also some other Courseworks
