

ERIC HEINZ

DEVELOPER

ericTempler@googlemail.com

+49 151 - 59895486

Profile

Full Name	Eric Dominic Heinz
Birthday	09 September 1990
Address	Im Bienengarten 25, 55218 Ingelheim, Germany
Languages	German (Native), English (C1)

Skills

Teamwork

I have worked in Teams of various sizes across multiple Orgs. Most of the time in close contact, as if I would share an office with them.

Software Testing

Testing is critical for every non trivial software and therefore best implemented as early as possible. Robust testing enables a bugfree Application.

Agile Methods

I am accustomed to work in an agile environment and had the opportunity to guide other teams in this regard.

I am of the opinion that this is one of the best methods for backend developing.

New Technologies

New Technologies, like currently LLMs, should always be evaluated and integrated into the Product or Toolchain, if useful of cause.

University

Graduation

Bachelor of Science in Informatik
at Gutenberg Universität Mainz

Nebenfach: BWL

Bachelor Thesis

- Visualisierung von Volumendaten mithilfe der Oculus Rift

Specialization

- Client-/Serverseitige Webanwendungen
- Operating Systems
- Mobile Computing
- Artificial Intelligence

Seminars

- Angewandte Algorithmik
- Approaching Programming Contests

Professional Experience

C/C++	Docker	Go / Golang
PHP	Behat/Gherkin	Typescript/Javascript
C#	Python	

<i>Knowledge of</i>	AI Systems / Theory	Linux / Unix	MySQL
	Java	HTML 5.0 / CSS	Lua
	Bash	Clean Code & TDD	Agile Environments

<i>Frameworks</i>	React	PyTest	Laravel
	Unity	QT	Node.js

<i>Interests</i>	Virtual Reality	Theoretical computer science	Carnivorous Plants
	Retrocomputing	Simulation	

<i>Presentations</i>	Speaker at GPN24 Talk about some unusual and unexpected parts in various programming languages with my colleague Matheus Gagno Brunetti: How to reverse access Arrays, fun about floats, redefining constants on the fly, and more. media.ccc.de/v/gpn24-578-three-languages-triple-the-confusion	07 June 2026
----------------------	--	--------------

<i>Experience</i>	Backend Developer at Link11 GmbH Free to work after September 01 Backend C and Python programming and maintenance of main cloudbased DDOS detection/defending application and internal support Tasks: ● Fixing of customer found bugs ● Maintenance/Developing of internal tools, e.g. Agile Sprint Analyse ● Internal engineering and tooling workshops ● Maintenance of Systems	2023 - August 2026
	Junior (Backend) Developer at NFON AG Backend api programming in PHP for a Cloud-based telephone system and supporting/developing internal Tools. Also Testing with Behat Tasks: ● Fullstack Developer for internal Tools ● Backend API Design of the telephone system ● Reimplementaion of old Services in Golang	2016 - 2023
	Fullstack Developer at eTermio GmbH Fullstack (Frontend/Backend/DB) for a Online-Calender-App Tasks: ● Fullstack (Frontend/Backend/DB) Development ● API Design ● Communication between customer and internal Databases and E-Mail composition	2014 - 2015

Working Student Developer at eTermio GmbH

Working Student (Frontend/Backend/DB) for a Online-Calender-App

2013 - 2014

Studied Informatik B.Sc. at Gutenberg Universität Mainz

Programming of an Onlinevoting-System at my University, also some other Courseworks

2010 - 2015

Abitur

General University Entrance Qualification

2010
